Xavier Student Center

About the Project :

A platform for students where they can -

- Discuss the doubts
- Access study Material
- Upload Previous Year Questions
- Test themselves by taking Quiz
- Upload study Material

Why this project is useful ?

Usually students look after social media platforms for a discussion with their friends on some topic or to share any kind of study material whether it is a book or previous year question papers.

But such platforms are not made specifically for study purpose & hence they ain't suitable if studies are concerned.

Student should be exposed to an environment which is strictly based on academics thus eliminating any sort of distractions.

Our attempt is to create **Xavier** as one of the platform which can help students with above mentioned features.
